Royal Wedding 2018

Meghan will walk down the aisle of St George's Chapel at Windsor Castle

Data Collection & Processing

Use Tweepy to Stream Twitter feeds with hashtags such as:

#royalwedding 

#meghanmarkle 

#royalfamily 

Capture twitter data in MongoDB in AWS.

- Tweet Text
- Location
- Time published
- User Name

Retrieve tweets from Mongo (in AWS) and process tweets in Python (on local machine).

- Enable authorization
- Open port on EC2 instance
- Use pymongo with remote MongoDB server

Process Text using the following steps:

- Cleaning
- Stemming
- Lemmatization
- Vectorization (Count-Vectorizer)

Topic Analysis

- **LSA Top Topics:**

- Kensington Royals
- The Family (Charlotte, Kate, Diana)
- Congratulations Duke and Duchess of Sussex
- Bishop Curry's Sermon
- Royal Family (Megan's Identity)

Topic Analysis - Volume

KMeans Clustering (k=6)

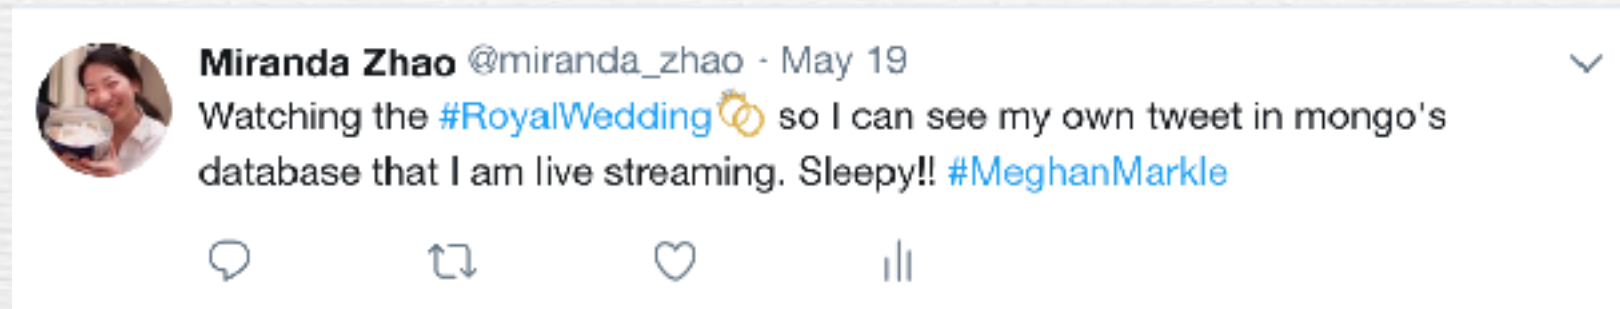

Who's Tweeting?

♦ *Note: Sentiment not to scale.*

What about my tweet? 🧑

From KMeans - Cluster 1:

$0.0398 * \text{Topic0} + 0.0004 * \text{Topic1} + 0.0019 * \text{Topic2} + 0.0031 * \text{Topic3} + 0.0017 * \text{Topic4}$

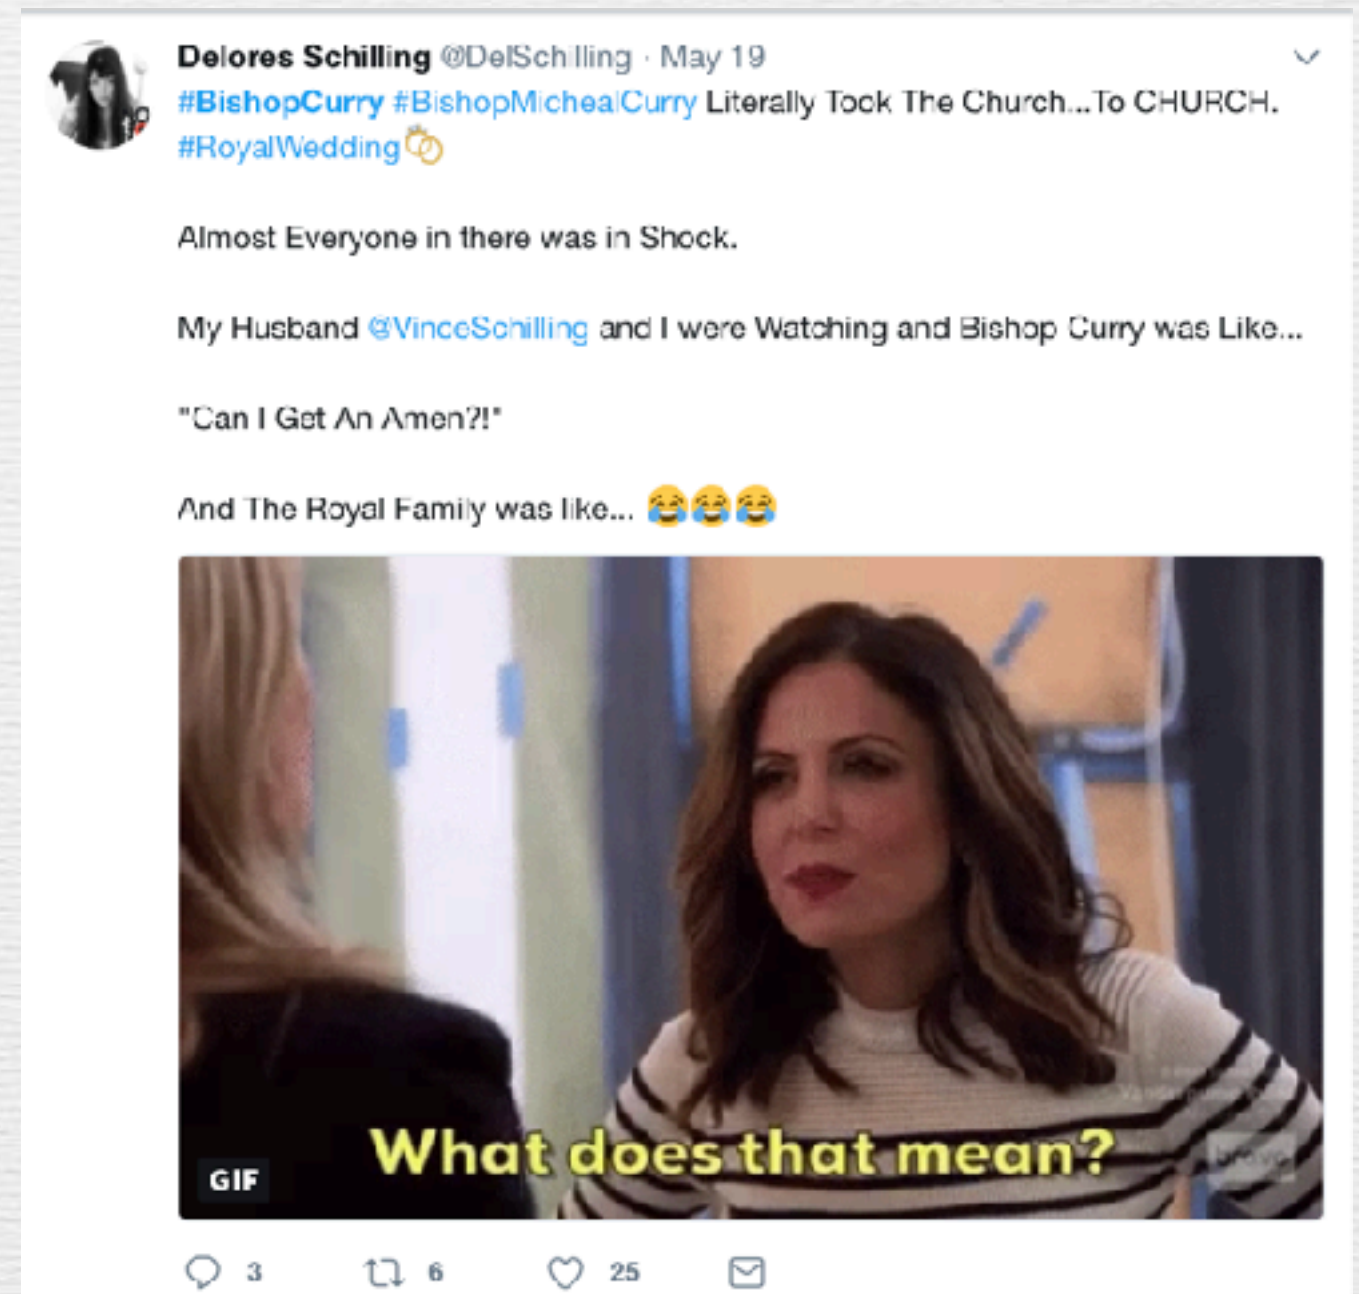

Next Steps & Applications

Next Steps

- Capture Meme and Understand it
- Gather tweets prior to the event

Applications

- Analyze reactions by different geographic location (e.g. tariffs on steel and aluminum)

All the Best!
